

HALO™

HALO™ is a selective post emergent herbicide for use in landscapes, beds, turf and agriculture. This patented post emergent bio herbicide is effective on a broad range of weeds.

DIRECTIONS:

HALO™ can be used on the following weeds and much more: Dandelion, Clover, Foxtail, Wild Violets, Japanese Knotweed, Quack Grass, Barnyard Grass, Curly Dock, Annual Bluegrass, Foxtail, Orchard Grass, Catch Weed, Plantain and more. Second applications may be necessary for hard to kill weeds.

Mix Rate:

Low Rate: 7 oz HALO™ with 1.5 to 2 gallons of water per 1000 sq ft

High Rate: 10 oz HALO™ with 1.5 to 2 gallons of water per 1000 sq ft

Spot spray: 10 oz HALO™ in 1 gallon of water

For optimal results apply to weeds during early periods of growth, during warm, dry weather. Do not apply during windy conditions. The speed of action on weeds is affected by environmental conditions.

Halo is a minimum risk pesticide compliant with EPA 25b. This product has not been registered by the US Environmental Protection Agency (EPA). ICT Organics represents that this product qualifies from exemption from registration under the federal insecticide, fungicide and rodenticide act. (FIFRA)

ACTIVE INGREDIENTS:

Eugenol.....2.5%

Clove Oil.....3.0%

Inert.....94.5%

Total100%

INERTS:

Water, Soybean Flour, Wintergreen Oil, Urea, Cottonseed Meal, Potassium Humate, Potassium Acetate, Soap

FOR PROFESSIONAL USE ONLY

STORAGE & DISPOSAL Store in original container in a dry cool place, inaccessible to children and pets. Avoid exposure to extreme temperatures. In case of spill or leakage, soak up with absorbant material and dispose of with trash in a sanitary landfill.
